

# SAUER GROUP CAPE CANAVERAL

*For over 40 years, Sauer has provided mechanical contracting services* in the aerospace industry by supporting NASA's space program initiatives at Kennedy, Stennis, Marshall, and Johnson Space Centers, and Cape Canaveral Air Force Station. Our successful long-term working relationship with NASA, the U.S. Air Force, and Defense Contractor partners, including Boeing and Lockheed Martin, is indicative of Sauer's commitment to delivering innovative solutions and performing at a consistently high level relative to quality, safety, and timely delivery.

Our project experience includes new installations, renovations, and additions to administrative support offices, fixed and mobile launch pads, and the installation of heavy mechanical services including process piping, cryogenic piping, central energy plants, deluge systems, and traditional mechanical systems. Our services and expertise consistently exceed our clients' expectations. This has been and continues to be our commitment to you.

## CAPE CANAVERAL CAPABILITIES / SERVICES

- Carbon steel pipe fabrication and installation of up to 60", any wall thickness;
- Stainless steel pipe fabrication and installation of up to 36", any wall thickness;
- Stainless steel and AL6XN tubing fabrication and installation from ¼" to 2" flared or automatic orbital welded;
- 3D AutoCAD and SDS2 modeling / drafting capabilities for pipe and structural design.

## NASA MOBILE LAUNCHER

Sauer provided all mechanical and select steel work for this new launch platform. The project consisted of fabrication, assembly, erection, examination, testing, and finishing of all components necessary to build the launch platform structure and support systems. The launch platform consists of a mobile launcher base and vehicle access tower.

## LAUNCH COMPLEX 41

Sauer provided all mechanical and certain structural and specialty fabrication work for this new launch complex at Cape Canaveral Air Station, Florida. In addition to the mechanical infrastructure work, the scope included a Mobile Launcher Platform and remote support facilities with a vehicle integration facility.
